

EUROPEAN UNION REGULATORY FRAMEWORK – REACH RESIGTRATION, EVALUATION, AUTHORISATION OF CHEMICALS

The REACH regulations require the registration of all substances manufactured or imported into the EU in quantities greater than 1 tonne per annum.

ROCOL continues to monitor the passage of REACH and is developing an appropriate strategy to respond to the regulations as the requirements become clear.

At this time, we are not aware of any products supplied from the ROCOL manufacturing facilities in the UK that will be withdrawn due to the requirements of REACH.
